### 8.2. Exposure controls:

In case of a hazardous material with no controlled concentration limit it is the employer's duty to keep concentration levels down to a minimum achievable by existing scientific and technological means, where the hazardous substance poses no harm to workers.

#### 8.2.1. Appropriate engineering controls:

In pursuance of work is proper foresight needed to avoid spilling onto clothes and floors and to avoid contact with eyes and skin. Ensure adequate ventilation.

#### 8.2.2. Individual protection measures, such as personal protective equipment:

Observe the general safety regulations when handling chemicals.

Contact with eyes, skin and clothing should be avoided.

Do not eat, drink, or smoke when using this product.

After the use of this product wash hands thoroughly.

Observe the pertinent regulations on industrial safety and basic hygiene rules.

The information regarding personal protective equipment is only for informative purposes. A complete risk assessment is required before the use of the product for the determination of the appropriate personal protective equipment, taking local circumstances into account.

- Eye/face protection:** If there is a risk of eye contact, the use of appropriate protective glasses is recommended (MSZ EN ISO 16321-1:2022; EN 166).

Recommendation: nitrile-butyle rubber (NBR) protective gloves.  
Minimal permeation time: ≥480 minutes.  
Suggested thickness of glove material: ≥0.38 mm.  
The glove material should be impermeable and resistant to the product. Due to missing tests no recommendation to the glove material can be given for the product. Select glove material based on the penetration time, rates of diffusion and degradation. The selection of suitable gloves does not only depend on the material, but also on further marks of quality which may vary from manufacturer to manufacturer. As the product is a mixture of several substances, the resistance of the glove material cannot be calculated in advance and has therefore to be checked before use. The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.
  - Other:** The use of appropriate protective clothing is recommended.
- Respiratory protection:** Normally not necessary. In case of dust generation, use appropriate respiratory protective device (dust mask).

4. **Thermal hazards:** No thermal hazards known.

8.2.3. **Environmental exposure controls:**

No specific prescription.

The requirements detailed in Section 8 assume skilled work under normal conditions and usage of the product for appropriate aims. If conditions differ from normal or work is carried out under extreme conditions, an expert's advice is necessary before deciding upon further protective measures.
